

ANANT HEJIB

AI/ML | Computer Vision | Robotics | Full-Stack & Frontend Engineering

Pune, Maharashtra | +91 80075 79894 | ananthejib28@gmail.com

github.com/AnantHejib | linkedin.com/in/anant-hejib-b277a82a2 | anant-hejib-portfolio.vercel.app

PROFESSIONAL SUMMARY

Computer Engineering student and hands-on engineer focused on computer vision, machine learning, robotics autonomy, and full-stack product development. Experience building autonomous surface-survey workflows, robot-facing perception systems, real-time operator interfaces, secure APIs, and responsive web applications. ISRO Robotics Challenge–URSC 2026 finalist with experience collaborating in a 10-member remote engineering team.

EDUCATION

Sinhgad Institute of Technology, Lonavala

Oct 2024 – Jul 2028 (Expected)

Bachelor of Engineering (B.E.), Computer Engineering

Pune, Maharashtra

CGPA: 8.09/10

TECHNICAL EXPERIENCE

BlackHole Infiverse

Oct 2025 – Jul 2026

Project Intern / Computer Vision Engineer

Remote — Mumbai, India

- Contributed as the computer vision engineer in a 10-member team developing an autonomous computer-vision survey system for scanning physical surfaces.
- Built and tested perception and machine-learning workflows using Python, TensorFlow, Keras, and SLAM concepts for surface-survey and robotic-system requirements.
- Supported system visualization and operator-facing interfaces using React and Three.js, connecting perception output with an interactive web experience.
- Translated research and project requirements into integration-ready vision workflows while collaborating remotely across engineering responsibilities.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, C++, Java, Go, SQL, R, HTML, CSS

Computer Vision & Robotics: OpenCV, YOLOv8/YOLOv10, Detectron2, DeepSORT, MediaPipe, SIFT, FLANN, RANSAC, OCR, image segmentation, object detection, tracking, SLAM, ROS 2, PX4, FAST-LIO, LiDAR, CUDA, TensorRT, OpenVINO

AI/ML: TensorFlow, Keras, PyTorch, Scikit-learn, XGBoost, LightGBM, Hugging Face Transformers, LangChain, LlamaIndex, MLflow, Weights & Biases

Frontend & Visualization: React, Next.js, Vue.js, Tailwind CSS, Material UI, Three.js, D3.js, Chart.js, Recharts, Plotly, Matplotlib, Seaborn

Backend & Data: Node.js, Express.js, FastAPI, Flask, Django, Spring Boot, REST APIs, GraphQL, WebSockets, PostgreSQL, MySQL, MongoDB, Redis, SQLite

Tools, Cloud & Security: Git, GitHub, Docker, Kubernetes, Linux, Google Cloud, JWT, OAuth 2.0, Auth0, RBAC, Stripe, AWS S3

AWARDS & CERTIFICATIONS

- Finalist, ISRO Robotics Challenge–URSC 2026 (IRoC-U)** — Computer Vision Engineer, Team IIC_SIT (Team 10144).
- Deloitte Data Analytics Job Simulation** — Completion certificate.

ANANT HEJIB

Selected Engineering Projects & Leadership

+91 80075 79894 | ananthejib28@gmail.com | github.com/AnantHejib

SELECTED PROJECTS

Autonomous Drone Mapping — ISRO Robotics Challenge—URSC 2026

2026

Python, OpenCV, SIFT, FLANN, RANSAC | github.com/AnantHejib/Drone_mapping

- Developed a GPS-denied micro-UAV mapping workflow for constrained 12-meter lawnmower flight paths and automated base-station processing.
- Implemented blur rejection, SIFT feature extraction, FLANN matching, Lowe's ratio testing, RANSAC homography, and orthomosaic stitching.
- Served as Computer Vision Engineer for Team IIC_SIT (Team 10144), selected as an IRoC-U finalist.

Boundary Evasion Ground Control System

Project

Python, Flask, OpenCV, JavaScript | github.com/AnantHejib/boundary-evasion-dash

- Built an autonomy-support system that uses HSV segmentation and contour filtering to detect boundaries and generate normalized X/Y escape vectors.
- Created a Flask application with MJPEG video streaming and a 10 Hz browser telemetry interface for real-time operator feedback.

Robot Vision Systems — BlackHole Infiverse

2025 – 2026

Python, TensorFlow, Keras, Computer Vision, SLAM, React, Three.js

- Developed image-processing and machine-learning components for an autonomous surface-survey project within a 10-member remote team.
- Connected vision-oriented system output to interactive visualization and operator-facing web components.

Digital Legacy Protocol — Web3/Fusion 2025

2025

Solidity, Web3, MetaMask, Smart Contracts

- Prototyped an owner-controlled digital-asset succession workflow using MetaMask and smart contracts.
- Modeled beneficiary intent and conditional succession while preserving self-custody principles.

Additional AI, Vision & Full-Stack Systems

Portfolio

Built and documented projects covering automated defect detection, PPE compliance, smart checkout analytics, number-plate recognition, medical-image screening, crop-disease detection, churn prediction, demand forecasting, recommendation systems, resume screening, learning platforms, patient records, logistics dashboards, e-commerce, and finance APIs. Complete case-study archive: anant-hejib-portfolio.vercel.app

LEADERSHIP & ACTIVITIES

Institution's Innovation Council (IIC), SIT

Leadership

Social Media, Public Relations, Marketing & Multimedia Head; leads communication and visual storytelling for institute innovation initiatives.

Sinhgad Capture Crew

College In-Charge

Coordinates visual coverage, team responsibilities, timelines, and live event execution.

National Service Scheme (NSS)

Documentation Team

Creates structured records and documentation for community initiatives.

National Hackathons

10+ Events

Participated in multidisciplinary national hackathons spanning computer vision, robotics, AI/ML, Web3, and full-stack product development.

LANGUAGES

English — Professional | Hindi — Fluent | Marathi — Native

ADDITIONAL INTERESTS

Cinematography, video editing, singing, event coordination, technology communication, and gaming.
