

ANANT HEJIB

AI/ML | Computer Vision | Robotics | Full-Stack & Frontend Engineering

Pune, Maharashtra | +91 80075 79894 | ananthejib28@gmail.com | github.com/AnantHejib
linkedin.com/in/anant-hejib-b277a82a2 | anant-hejib-portfolio.vercel.app

Computer Engineering student building computer-vision, machine-learning, robotics-autonomy and full-stack systems. Experience developing autonomous surface-survey workflows, robot-facing perception and real-time interfaces. ISRO Robotics Challenge–URSC 2026 finalist with remote experience in a 10-member engineering team.

EDUCATION

Sinhgad Institute of Technology, Lonavala

B.E., Computer Engineering

Oct 2024 – Jul 2028 (Expected)

Pune, Maharashtra

CGPA: 8.09/10

TECHNICAL SKILLS

Programming

Python, JavaScript, TypeScript, C++, Java, Go, SQL, R, HTML, CSS

Vision & Robotics

OpenCV, YOLO, Detectron2, DeepSORT, MediaPipe, SIFT, FLANN, RANSAC, OCR, segmentation, SLAM, ROS 2, PX4, FAST-LIO, LiDAR, CUDA, TensorRT, OpenVINO

AI & Machine Learning

TensorFlow, Keras, PyTorch, Scikit-learn, XGBoost, LightGBM, Hugging Face, LangChain, LlamaIndex, MLflow, W&B

Frontend & Visualization

React, Next.js, Vue.js, Tailwind CSS, Material UI, Three.js, D3.js, Chart.js, Recharts, Plotly

Backend & Data

Node.js, Express, FastAPI, Flask, Django, Spring Boot, REST, GraphQL, WebSockets, PostgreSQL, MySQL, MongoDB, Redis

Tools & Cloud

Git, GitHub, Docker, Kubernetes, Linux, Google Cloud, JWT, OAuth 2.0, RBAC, AWS S3

AWARDS & CERTIFICATIONS

- Finalist:** ISRO Robotics Challenge–URSC 2026 (IRoC-U), Team IIC_SIT 10144
- Deloitte:** Data Analytics Job Simulation completion certificate

LEADERSHIP

IIC, SIT: Social Media, PR, Marketing & Multimedia Head

Sinhgad Capture Crew: College In-Charge

NSS: Documentation Team

Hackathons: 10+ national events

LANGUAGES

English — Professional

Hindi — Fluent

Marathi — Native

TECHNICAL EXPERIENCE

BlackHole Infiverse — Project Intern / Computer Vision Engineer Oct 2025 – Jul 2026

Remote — Mumbai, India | 10-member engineering team

- Developed computer-vision components for an autonomous system designed to survey and scan physical surfaces.
- Built and tested perception and ML workflows using Python, TensorFlow, Keras and SLAM concepts.
- Supported interactive system visualization and operator interfaces using React and Three.js.
- Converted research requirements into integration-ready vision workflows through remote collaboration.

SELECTED PROJECTS

Autonomous Drone Mapping — IRoC-U Finalist 2026

Python, OpenCV, SIFT, FLANN, RANSAC | github.com/AnantHejib/Drone_mapping

- Developed a GPS-denied micro-UAV mapping workflow for constrained 12 m lawnmower flight paths and automated base-station processing.
- Implemented blur rejection, feature matching, Lowe's ratio testing, RANSAC homography and orthomosaic stitching as Computer Vision Engineer for Team IIC_SIT.

Boundary Evasion Ground Control System Project

Python, Flask, OpenCV, JavaScript | github.com/AnantHejib/boundary-evasion-dash

- Converted HSV and contour-based boundary detections into normalized X/Y escape vectors.
- Created a Flask system with MJPEG streaming and a 10 Hz browser telemetry interface.

Digital Legacy Protocol — Web3/Fusion 2025

Solidity, Web3, MetaMask, Smart Contracts

- Prototyped owner-controlled beneficiary intent and conditional succession for self-custodied digital assets.

Robot Vision Systems 2025 – 2026

Python, TensorFlow, Keras, SLAM, React, Three.js

- Built perception, ML and interactive visualization components for an autonomous surface-survey project.

ADDITIONAL ENGINEERING PORTFOLIO

Computer Vision: defect detection, PPE compliance, smart checkout, number-plate recognition, gesture control, medical screening, crop-disease detection.

AI/ML: churn prediction, real-estate pricing, ticket routing, recommendations, spam detection, forecasting, customer segmentation.

Full Stack: task management, e-commerce, resume screening, logistics dashboard, learning platform, patient records, personal-finance API. Full case studies are available on the portfolio.
